

The Cuan Licensed Guest Inn's Environmental Policy

Promoting Green Tourism

At The Cuan we appreciate the impact tourism has on our environment. We recognise that we have a responsibility to manage and minimise the contribution that our activities and services make without compromising the quality of our guests' stay. We aim to do this through the following environmental policy:

- To record and monitor current usage of energy and water.
- To set targets and objectives in order to reduce our consumption of these thus reducing the environmental impact and develop procedures to achieve them.
- To comply with relevant legislation and regulations relating to our impact on the environment.
- To prevent pollution and minimise our consumption of utilities and resources. We endeavour to reduce carbon emissions, effluents and waste and aim to continue to recycle where possible.
- To ensure that our environmental policy is communicated to all involved in The Cuan including our guests.
- Encourage an interest in our environment among our guests by communicating information such as environmental watches to our guests through in-house notices, on our website and on social media.
- Ensure that contractors and suppliers are encouraged to adopt responsible approaches to the environment.
- Ensure that staff are trained and guests given appropriate information.
- We will continue our responsible approach to sourcing food by supporting local, seasonal, organic and fair-trade where practical.
- Suppliers will be encouraged to deliver their goods in reusable packaging.
- To work with local and national bodies in promoting issues with regards to the environment.
- To strive for continual improvement in our environmental performance.
- During subsequent refurbishment, we will make every effort to install measures which reduce our environmental impact, including our current policy to replace all light bulbs with LED bulbs as and when the need arises.
